

I am a Flight Attendant for Us Airways Express/PSA Airlines. Please DO NOT allow the use of cellular telephones on Commercial Airline flights. Not only would it be an annoyance to other passengers, during an emergency situation passengers would be more apt to call their loved-ones rather than pay attention to the emergency instructions and commands that myself and the other flight attendants on board would be giving. Please, do not put the lives of our flight crews and passengers in danger by allowing the use of cellular telephones on board a flight--our jobs are difficult enough! Thanks you for your consideration.
